

TOPIC

Top of the range for hygiene and economy

TOPIC in detail

At last more time for patients. TOPIC takes the strain

The innovative TOPIC range of appliances works with rigorous efficiency to create painstaking cleanliness and disinfection, releasing nursing teams from this work so they can devote themselves to their real job – interaction with their patients.

TOPIC is sophisticated technology. Robust technology made from stainless steel which is the starting point for a long working life, easy cleaning and meticulous hygiene. Top design: the deep-drawn cleaning chamber is designed to be self-cleaning with no corners and sharp edges. The water jet system is arranged to provide intensive cleaning, guaranteeing optimal hygiene for care utensils.

Bed pans, urine bottles, commode buckets, etc, are automatically and reliably emptied, cleaned and disinfected. And always safely behind a sealed door, of course. This means modern hygiene, convenience and a reduced work load for the entire nursing staff. And the accountants can also breathe a sigh of relief – *TOPIC*'s reliable, low maintenance technology makes only miserly demands on resources and budgets.

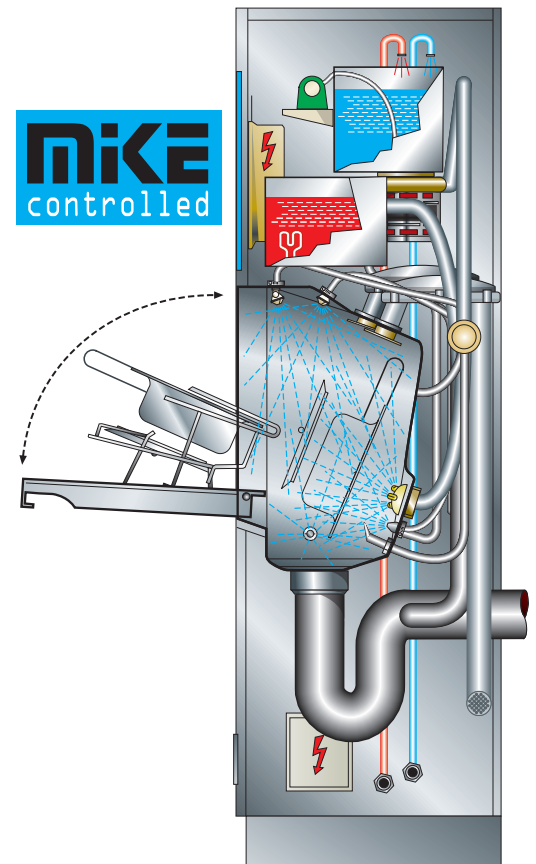

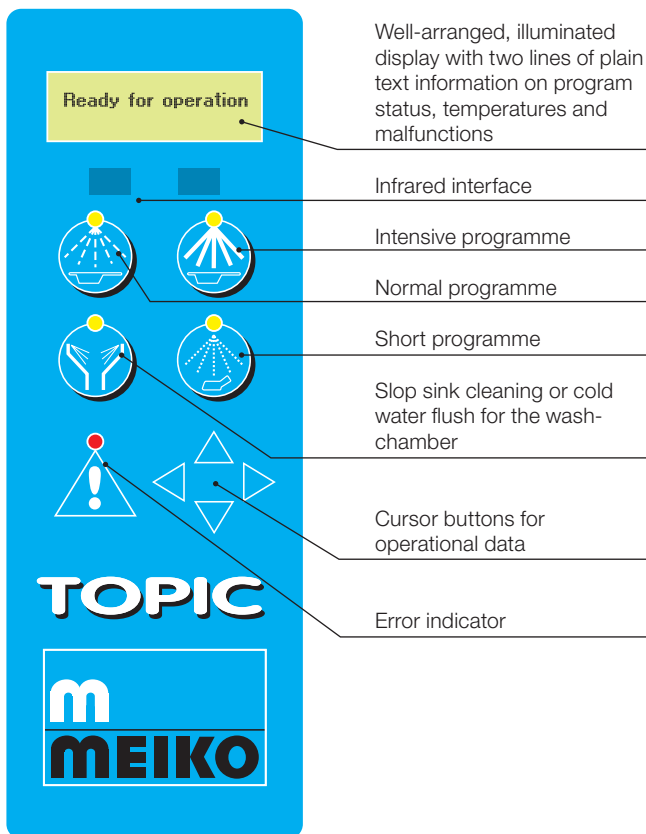

Your TOP TEN: the *TOPIC* hygiene advantages

- Ideal operation as a result of the “One Touch”-operating system with large-sized membrane key-pads and unambiguous icons
- Hygiene security thanks to the A_0 value control system complying with DIN EN ISO 15883
- Very economical due to reduced use of water, detergent and rinse agents
- Short, individually adjustable and effective program cycles
- Maximum flexibility provided by multi-functional brackets for care utensils
- Patented, steam-proof cleaning and disinfection system
- All-round cleaning by the powerjet system
- Electronic controls with versatile cleaning programs
- Hygiene security created by thermal disinfection
- Multiple uses from functionally efficient options and extensive accessories

TOPIC cleaning and disinfection appliances provide maximum ease of operation. Starting the program, appliance control and operational analysis are all managed via the simple *TOPIC* membrane key-pad.

Simple “*One Touch*” technology and the innovative *M-Commander* analysis software help you to help your patients – only with *TOPIC* is patient care so simple and easy.

Everything plainly in view:

TOPIC with *M-Commander* and *M-Commander W*, the analysis software for MEIKO cleaning and disinfection appliances.

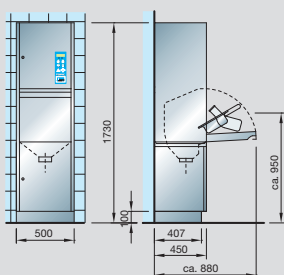

TOPIC – versatility for all eventualities

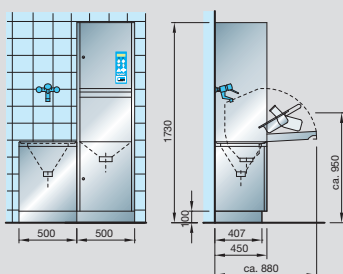

TOPIC cleaning and disinfection appliances are always a tip-top solution: for every room, whether as a stand-alone appliance or a customised combined sluice unit and slop sink. TOPIC makes everyday nursing tasks easier and more effective.

- Fast and simple installation and connection
- Designed with integral thermal and acoustic insulation
- Direct and simple access for rapid servicing and maintenance

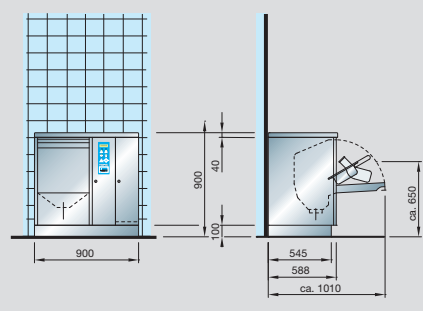

TOPIC as free-standing device

TOPIC as small combined sluice unit

TOPIC for installation under a work surface

The MEIKO Team would be happy to help you find the perfect solution for your specific hygiene requirements. Just call us!

TOPIC 20

A top-notch free-standing appliance

Place in position and connect – job done! Ideal for taking advantage of existing connections. The very latest!

TOPIC 10 with slop sink

The “floating”, wall-mounted combined sluice unit and slop sink leaves the floor free; developed from the TOPIC 10 cleaning and disinfection appliance and a slop sink specially designed for this application.

SAN 14 B

The small combined sluice unit

TOPIC 40 with hand wash basin, small work and storage surface and slop sink with an efficient splash screen. Small but perfectly formed!

SAN 20 BW

The spacious combined sluice unit

TOPIC 40 with slop sink, ergonomic hand wash basin, larger wash basin, work surface and cabinet. Simply great!
