Perfect and cost-effective
for healthcare facilities

TOPIC product range

TOPIC

Suitable for every sluice room

The new MEIKO *TOPIC* is the perfect and cost-effective MEIKO cleaning and disinfection appliance to meet the hygiene requirements of patient utensils in care facilities.

Depending on the situation in the building, MEIKO *TOPIC* appliances can be supplied for wall-mounting so that they are clear of the floor or for installation directly on the floor. And as care units complete with everything that is necessary and beneficial, *TOPIC* stand-alone appliances are specially designed for the rapid and uncomplicated replacement of out-dated cleaning and disinfection technology. They are modified to fit into the position of the old appliance whatever the make of the original – and to use the same connections.

We will work with you to develop an ergonomic sluice room design which meets the most stringent demands of cost-effectiveness, optimisation of work processes, safety in the work-place and hygiene. In this way you will receive your own solution customised to meet the hygiene standards you require.

TOPIC cleaning and disinfection appliances

The clean solution
