

# CLEANING

STARTS WITH

# REHAWASH SYSTEMS GMBH

RehaWash was founded in 2001 in Weiswasser, just outside Berlin. The German federal state of Saxony (Sachsen), where the company is located, is one of the most innovative regions in the country and is known for its modern automotive industry and the excellence of its engineering. Here is the birthplace of significant inventions such as the sewing machine and washing machine!

# THE UNIQUE ADVANTAGES OF OUR THERMO CHEMICAL CLEANING AND DISINFECTION SYSTEMS

## CERTIFICATED DESINFECTION

Hygiene analysts have concluded from detailed lab tests that the RehaWash goes further than standards set out in the German Medical Products Act. All RehWash machines are fully certified as required by European standards EN ISO 15883.

## TIMESAVING

An item can be cleaned using the RehaWash System within a couple of minutes compared to the 15 minutes or thereabouts it would take to manually clean it.

## SIMPLE AND MOBILE

The specially tested cleaning, disinfecting and rinsing programs are easy to operate from a simple control panel. Thanks to their restricted weight and the 4 turning wheels the machine can be easily moved.

## SAFE FOR EMPLOYEES

Employees are not exposed to the dirt that comes off the items being cleaned thanks to the sealed washing chamber and there is therefore no risk of contamination. Contact with detergents is also avoided. Additional advantage is the tremendous reduction of physical stress.

## MORE ENVIRONMENTALLY-FRIENDLY

A minimum volume of water is used per washing cycle whilst the addition of organically decomposable cleaning detergents is calculated precisely according to the level of cleaning / disinfection required. This computerized process prevents waste.

## MORE ENVIRONMENTALLY-FRIENDLY

A minimum volume of water is used per washing cycle whilst the addition of organically decomposable cleaning detergents is calculated precisely according to the level of cleaning / disinfection required. This computerized process prevents waste.

## FIXED COSTS

Because the duration and level of every washing cycle is programmed in advance, you can precisely calculate the costs of cleaning each item.

## NEED FOR LESS STOCK

According to the type of item you can reduce your need for stock since you are no longer dependant on contractors to do the work, with the additional time this takes. Your products can be put back into operation more quickly!

## IMPROVED CARE

Less chance of infections contributes to healthier patients.

# THE REHAWASH FAMILY

---

## MODEL 313 | WHEELCHAIRS

We have developed a specific model for washing wheelchairs, complete with a wheel wash function. Different models available according to the size of the wheelchair. Thanks to additional accessories like a basket, it is also possible to place smaller products like a walking frame in the machine for cleaning.

---

## MODEL B309 | BEDS

For cleaning beds we can offer 2 versions; one version cleans beds in transport position (foldable beds) and the second version cleans beds in normal (horizontal) position, especially made for hospitals.

---

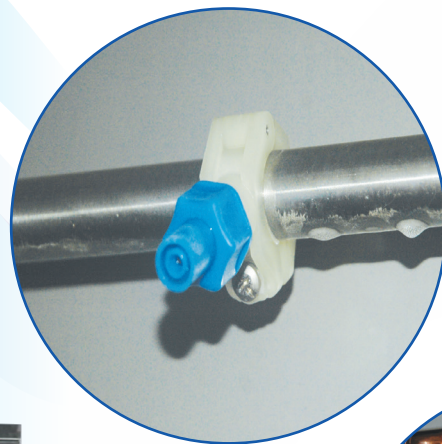

## MODEL B904 | BEDS

For cleaning beds we can offer 2 versions; one version cleans beds in transport position (foldable beds) and the second version cleans beds in normal (horizontal) position, especially made for hospitals.

# HIGHEST INTERNATIONAL SAFETY STANDARDS.

## ALL OUR SYSTEMS HAVE THE FOLLOWING QUALIFICATIONS:

EN ISO 15883, cleaning and disinfection equipment;

Richtlinie (Guideline) 93/42/EWG Anhang V. All our systems are qualified as Medizinprodukte Klasse IIa (CE 0197) – medical devices class IIa;

EN ISO 13485:2012, medical devices and quality management system requirements;

VDE 0100-701, Errichten von Niederspannungsanlagen (development of low voltage systems) – part 7-0701.

Rehawash has a quality assurance system according to DIN EN ISO 13485.
